

ATTRACTIVE AND FUNCTIONAL DESIGN thanks to its curved structure.

The e600w is suitable for a multitude of solutions, from ticketing or queue and shift management to sophisticated healthcare management services.

It has a 19" screen and additional components such as ticket printers, ID card readers, magnetic stripe, RFID, barcode or fingerprint readers. Access and maintenance of all components is easy and convenient thanks to its three independently lockable doors located at the rear.

The e600w can be dressed on the front with digitally printed vinyl or customised in any RAL colour. EOS Ibérica can elaborate several proposals adapted to the corporate image and the customer's project.
