

UNATTENDED COLLECTION MANAGEMENT. It performs operations that require card payment transactions or cash collections and payments, with coins or banknotes, including document printing and collection functions. The eCajero is a compact terminal that allows the integration of different types of peripherals without losing usability and ergonomics.

The cash dispenser can be used from inside or outside the establishment thanks to the possibility of integrating a recessed frame, so that the cash always remains inside the premises and the interaction area is accessible to the user 24 hours a day. It has two doors with 3P security lock. The upper door is front opening. The lower door can be configured on either side of the kiosk.

PROFILE PRODUCT

Manufacturer: Grupo EOS Ibérica.
Origin: Manufactured and assembled in Spain.

- Production:**
> 4 Weeks (estimated time).
Material:
> 2mm carbon steel sheet.
Inner flanges:
> Galvanised and/or PVC.
Finish:
> High resistance epoxy paint.
Watertightness and sealing:
> IP65 (optional).
Dimensions: > 1705x480x480mm;
> 1705x480x480mm.
Structure weight:
> 80Kg.
Use:
> Indoor.
> Outdoor.
