

**Square communication.** Terminal designed to incorporate a large screen on both sides of the structure. This allows for a greater visual impact on customers or to speed up user interaction with the kiosk.

The monocoque structure has a double sealed base and forced ventilation. It can be manufactured in AISI 304 stainless steel, 316 for marine environments or 316L for corrosive environments. Designed under the IP65 standard to incorporate peripherals that support this degree of protection.

In addition, peripherals such as webcam, receipt printer, card reader or DNle can be integrated, adapting to the needs of each project. It is available in any colour from the RAL range and can be adapted to the customer's brand image by means of cut vinyl or digital image.
