

VANDAL-PROOF LOCKS FOR TABLETS.
Versatile support with lock and slot for Kensington cable.

ePad Line, designed to protect the electronic tablet, is a frame made of ABS, with a front and support tube made of metal alloy.

The arm is the minimum length necessary for its installation, which allows it not to protrude, thus integrating into the aesthetics of the environment.

The ergonomic inclination at 45° or 90° makes this tablet kiosk the best option. It offers easy and quick assembly and installation for both counter and wall. In addition, it is available in a wide variety of sizes so that you can use practically any tablet model.

PRODUCT PROFILE

- Direct importer:** EOS Ibérica Group.
- Replenishment period:**
 - > Permanent stock (check quantity).
- Material:**
 - > **Frame:** thermoplastic polymer (PC/ABS).
 - > **Front:** steel coated with high-resistance epoxy paint.
