

INTERACTION AND SELF-SERVICE. Thanks to its structure, the eAutoself can integrate the necessary components to attend to the services of any user: screen up to 22", touch screen, keyboard, POS, a variety of printers, membership card dispenser, etc. Its design and structure allow the incorporation of a 19" screen and payment module as well as the possibility of including up to three doors (side, rear and/or front) to facilitate maintenance, paper change, coin collection...

The eAutoself is not only a durable tool with many configuration options, it also has great communication power. It is available in any RAL colour with the possibility of adapting it to the corporate image. The marketing department of EOS Ibérica can elaborate several proposals suitable for each project.
