

SELF IN - Series

ATM. Multifunction 12" with electronic payment and cash handling capability

Indoor Kiosk

UNATTENDED COLLECTION MANAGEMENT. It performs operations that require card payment transactions or collections and payments in cash, with coins or bills, including the functions of printing and document collection.

The eCajero is a compact terminal that allows the integration of different types of peripherals without losing usability and ergonomics.

The ATM can be used from inside or outside the establishment thanks to the possibility of integrating a built-in frame, so that the cash always remains within the premises and the interaction area is accessible to the user 24 hours a day. It has two doors with 3P security lock. The upper door is front opening. The lower door is configurable on either side of the kiosk.
