

SMARTCITIES - Series

Totem with LED lamppost for outdoors

APPLICATION NON KIOSK

INTERACTION AND VERSATILITY AT THE SERVICE OF SMART CITIES. This functional and attractive totem has multiple uses, from lighting, as an efficient and modern LED street lamp with static panels or QR identifiers, to providing information to citizens, offering services in an open, unattended space.

Interaction with the eUrban can be through various interfaces used individually or in combination. Many devices can be integrated: touch screens, readers, buttons or keyboards, cameras or a simple intercom connected by GSM to the police or emergency services. This chameleon-like totem, which can be self-powered by a solar panel, can also be used as a bus stop, Wi-Fi hotspot, parking meter, bicycle rental management terminal, and more.

Its steel structure with an epoxy paint coating can accommodate several screens of different sizes: up to 17' horizontally and up to 19' vertically.
