

SOMETIMES LESS IS MORE. This stand is designed to use Windows, Linux or Android applications or to display slideshows.

With its small size, the eInfo has the advantage of being able to integrate different peripherals: touch screen, ticket printer, DNle reader, QR code reader, barcode reader and even an RFID reader.

This kiosk is very useful at trade fairs, congresses and exhibitions, whether used individually or in islands of two, three or four units.

Available in white or plain black, it can be personalised in any RAL colour and/or customised with cut vinyl or dibond panels printed with digital images.
