TECHNICAL SPECIFICATIONS

OTHER TECHNICAL DATA

I/O PORTS

Direct Importer: Grupo EOS Ibérica SA

Dimensions (ØxH): 36mm *45mm

Integration: 28 mm Ø

Temperature range: -20°~70°C

Frequency response: 20-20KHz

Signal-to-noise ratio: 70dB

Output impedance: 1.2kΩ (unbalanced)

Monitoring range: 50M2

Connection method: 3.5 mm jack cable

It can be used for electronic equipment with MIC-IN input. It has a built-in high-speed voice DSP (digital signal processor) processing unit. It also includes ambient noise and echo reduction processing.

Built-in microphone with a highly durable structure that is completely resistant to water and adverse atmospheric conditions. The connection method is via a 3.5mm jack cable.

BEZEL OPTIONS

No bezel options

MOST COMMON APPLICATIONS

- > Self-service machine
- > Outdoor recording
- > Access control
- > Payment system
- > Vending.

PRODUCT VALUES

- > Compatible with MIC-IN technologies.
- > Built-in.
- > Quick installation.
- > Vandal-proof.

SOME SUCCESS STORIES

- > Payment terminal integration.
- > Unattended kiosks.
