

Serie Indoor Kiosk

Terminal with integrated phone and facial recognition

Customisable / Indoor

Remote personalised attention. Kiosk designed to bring and facilitate the use of technology for the elderly to carry out electronic procedures remotely and assisted by a real person.

This technological solution allows the integration of a large number of peripherals such as telephone, intercom, printer, A4 scanner, DNle reader, USB ports or camera for facial recognition. In addition, it can be equipped with a 17" screen or with two screens. Terminal adapted for people with reduced mobility.

It can be customised with any colour from the RAL range or with digital or cut vinyl to adapt it to the customer's corporate image.
