

ACCESIBLES IN Series

Inclined column with multi-screen, multi-format configuration and rear access

Indoor Kiosk

Innovation, accessibility and functionality in a single terminal. This kiosk is designed with a unique feature: a 10-degree tilt that makes it especially accessible for people with reduced mobility, who can approach the device without their knees touching the terminal.

In addition to its ergonomic design, the eInfa stands out for its integrated signature digitiser and a wide range of peripherals such as DNle reader, QR codes in a compact size and a camera that can capture images of people interacting with the terminal.

Available in white or plain black, it can be personalised in any RAL colour and/or customised with cut vinyl or dibond panels printed with digital images.
