

ACCESIBLES IN Series

Curved multi-screen terminal with rear maintenance and keyboard or POS

Indoor Kiosk

Accessible and versatile interactive terminal designed for electronic procedures without the need for a digital signature, ideal for public administrations and e-government services. This kiosk enables individuals without a digital signature to sign electronically by capturing their handwritten signature through the terminal.

Its ergonomic design makes it suitable for use by individuals both with and without reduced mobility. It features a 19", 22", or 32" touchscreen and can be equipped with a webcam, printer, electronic ID (DNle) reader, among other peripherals. The eFirma Plus version also allows for keyboard integration.

The unit can be customised in any RAL colour and/or personalised with cut vinyl or printed dibond panels featuring digital images.
