

Android sample application installing setting

- This page is described based on a sample screen using “Google Pixel 6”. (Japanese screen example)

English screen

- “Settings” → “Apps” → “Special app access” → “Install unknown apps”
- Selecting the application (file manager) for using “apk file” installing.
- Tapping the button for making “Allow from this source” on.

- Sample screen in this document is the "Google Pixel 6" screen.
How to do the setting varies depending on the tablet device, mobile phone device or the file manager application.
Please contact the terminal device vendor when the screen and operations are different from those described in this document.
